### **STANWOOD-** On-Line Permitting Now Available

To improve city services to our residents and business community, the City of Stanwood is pleased to offer a new on-line permit portal that enables the public to submit building and land use permit applications to the city 24-hours a day. Another feature of the portal is over-the-counter permits. Over-the-Counter permits include residential mechanical, residential plumbing, and re-roof permits. These permit types are instantly issued once all the permit information is submitted. All other permit types require review and approval by the City Planner or Building Official.

The new on-line permit system is a simple process to apply and pay for permits from the convenience of your home or business. Access the on-line permit portal using the Online Permit button on the homepage of [www.stanwoodwa.org](http://www.stanwoodwa.org).

To learn more about applying for a permit visit [www.stanwoodwa.org/205/Building-Permitting](http://www.stanwoodwa.org/205/Building-Permitting).
